South Jersey East-West Corridor Analysis	01382	01382
---	-------	-------

LOCATION/DESCRIPTION

Delaware Memorial Bridge to Atlantic City Expressway, corridor study

A corridor study is needed to identify existing and potential corridors for better east-west access through the region. The general limits of the study would be the Delaware Memorial Bridge to the Atlantic City Expressway. The study would revisit the South Jersey Highway Needs Study, which did not yield any implemented projects, and is explicitly called for in SJTPO's 2025 Regional Transportation Plan.

40	(4) Route 77 to Elmer Lake	9327	9327
-----------	------------------------------------	-------------	-------------

LOCATION/DESCRIPTION

Route 77 to Elmer Lake, rehabilitation

This project will include correction of roadway deficiencies and substandard features, replace the pavement on Route 40 from the edge of the existing concrete to the edge of pavement including shoulders. The umbrella section of roadway drain will be maintained into ditches. The intersection of Front Street and Route 40 will be improved. The project also includes safety improvements as well as bridge deck rehabilitation and/or replacement. The project will include 8-foot shoulders which are bicycle compatible, as well as the construction of sidewalks, pedestrian crossings and signs.

49 40

Pennsville

95045

95045

LOCATION/DESCRIPTION

Interchange at Route 40, proposed improvements

The Route 49 eastbound lanes at the Route 40 overpass includes the I-295 off-ramp, the entrance to McDonalds (as well as the Hampton Inn and a restaurant) to the driver's right and the entrance to Hook Road and Lippencott Avenue to the left. Given this situation, this is a busy and often confusing intersection for eastbound motorists.

The New Jersey Route 49 Transportation System Management Study, dated October 1995, after identifying this as a congested and potentially hazardous complex intersection, recommended (1) the construction of far-side jughandle ramp to provide access to Hook Road from the Route 49 eastbound lane and (2) the elimination of the eastbound Route 49 left-turn movement to improve the safety of this intersection.

49	Salem/Cumberland, Bicycle Improvements	97024	97024
-----------	---	-------	-------

LOCATION/DESCRIPTION

Salem River to Route 55, proposed bicycle improvements

This project may provide improvements to correct and/or eliminate existing gaps on a primarily bicycle compatible route due to angled railroad crossings, deficiencies in bridge crossings, and conversion of a two-lane road with shoulders to a four-lane road without shoulders. The project may include installation of crosswalks, bicycle lane striping and signage, and regrading and improved access to bridges.

56	Maurice River Bridge Replacement	98356	98356
-----------	---	-------	-------

LOCATION/DESCRIPTION

This project will provide for the replacement of the existing structure along the same alignment. The existing structure has one 12-foot travel lane, one 3-foot outside shoulder and one 6-foot sidewalk in each direction. There will be one 12-foot travel lane and one 10-foot shoulder in each direction. In addition, because of the close proximity of the structure to the Route 55/56 interchange, missing acceleration/deceleration lanes on Route 56 from and to Route 55 will be provided. Guiderail upgrades will be made in the immediate vicinity of the structure and will extend along the Route 55 southbound ramp to Route 56 westbound, as well as the Route 56 eastbound to Route 55 southbound ramp. This project will be designed to be bicycle/pedestrian compatible via use of the shoulder.

295 CR 643	Exit 7, Straughens Mill Road	98327	98327
------------	------------------------------	-------	-------

LOCATION/DESCRIPTION

Proposed interchange improvement at I-295 and Straughens Mill Road

The ramp lanes on I-295 at Interchange 7 are of insufficient width and design to adequately and safely accommodate truck traffic. The area around this interchange will be developed for commercial-industrial use (with or without this improvement); therefore, it is anticipated that truck traffic will be increasing at this interchange.
